## EyeCheck 1000 & 900

### Description:

The EyeCheck 900 & 1000 series is an extremely compact and powerful smart camera, which can be easily integrated into existing systems. The cameras are available in color and gray and with the EyeVision image processing software, they can detect fine-grained patterns, which cannot be detected even by several sensor barriers or common sensors. The integrated evaluation software EyeVision allows the EyeCheck 900 & 1000 a very short period of adjustment and setup time.

The EyeCheck 900 & 1000 are very robust and with protection class IP67 suitable for rough environments.

The combination with the EyeVision Software offers an immense reduction in development time and maintenance costs of the machine vision systems. The creation of the inspection programs is easily compatible to customer needs, as EyeVision is a powerful and flexible software with a graphical user interface even for complex 2D and 3D applications.

The EyeVision software can handle every task, such as the detection of production differences, quality and color deviations, tracking of component parts, part recognition and differentiation, part sorting, pick-and-place, reader functions (bar code, DMC, QR, OCR/OCV), reject control, supervision of tolerances, label and surface inspection, pattern matching, etc.

The EyeCheck 900 & 1000 can be used in industries such as automotive, electronic, pharmaceutical, cosmetics, packaging, food and beverage industries as well as semiconductor industry and machine construction.
